## Build a Collaborative ToDo App Using M.E.R.N. Stack (for beginners)

React Native App

13:18

< + ...

Collaborative ToDo App (MERN stack)

Date Assign Tag

Prerequisites

- NodeJS: <https://nodejs.org/en/download/>
- NPM (comes with NodeJS)

Backend (GraphQL API with NodeJS and MongoDB)

Bootstrap the project vadim97

Follow the getting started guide: <https://www.apollographql.com/docs/apollo-server/getting-started/> Apr 2 vadimsavin

Execute your first query

Setup Nodemon to restart the server on changes 1

## In this video

- Setup new project using Expo

## Prerequisites

1. Environment setup for React Native  
NodeJS, NPM, Expo CLI, Android and/or iOS emulator

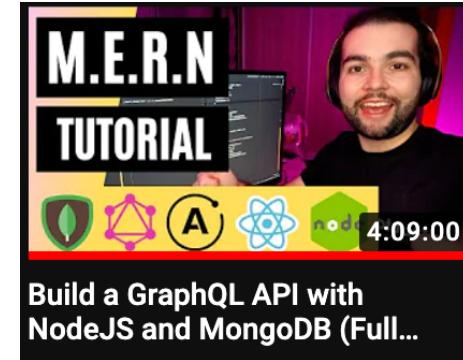

- 
2. Asset Bundle (dummy data, images, icons, PDF presentation):

<https://assets.notjust.dev/taskade>

- 
2. Taskade Board for Project Management

<https://bit.ly/3rLJ694>

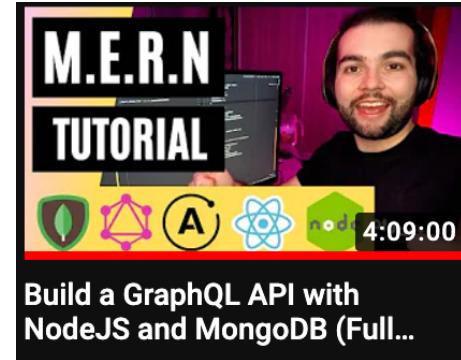

## Starting point

1. Part 1

## Project Lists

- Display a list of projects (TaskLists)
- Add new projects

The screenshot shows a mobile application interface for 'notJust Development'. At the top, there's a navigation bar with a back arrow, the title 'notJust Development', a checkmark icon, a filter icon, and a more options icon. Below the title, it says 'RECENT'. The main content area displays five project cards, each with a file icon, the project name, and a timestamp. Each card also includes three circular buttons for 'Date', 'Assign', and 'Tag'.

Project Name	Last Updated	Date	Assign	Tag
